Συναγωγὴ ζεσθαι, the ancient Greek verb chosen as the title of this volume, belongs to the jargon of dramaturgy as employed by Aristotle in Poetics, where he emphasizes the function of the Chorus as an active co-protagonist in the dynamics of drama. Here it suggests the collaborative nature of this Festschrift offered to Guido Avezù in the year of his retirement by friends and colleagues. The volume collects a wide selection of contributions by international scholars, grouped into four sections: Greek Tragedy (Part 1), Greek Comedy (Part 2), Reception (Part 3), and Theatre and Beyond (Part 4). The Authors. A. Andrisano, P. Angeli Bernardini, A. Bagordo, A. Bierl, S. Bigliuzzi, M.G. Bonanno, S. Brunetti, D. Cairns, G. Cerri, V. Citti, A.T. Cozzoli, F. Dall'Olio, M. Di Marco, M. Duranti, S. Scrivo questa nota per aiutarvi; per guidarvi tra le mie opere. Questi scritti sono i miei occhi che vedono; sono la mia testa che pensa ad alta voce. Il libro così composto è nato di punto in bianco dopo mesi di meditazione. Troverete dialoghi, poesie, riflessioni, frammenti e anche due racconti. È un libro intimissimo, decisamente introspeffivo e libero. E mi scuso già per qualche parolaccia; qualche immagine esplicita: ma ho lasciato intatto ogni mio pensiero per non censurare nulla: per essere vero nudo crudo; semplicemente me stesso. Crescere è il titolo: perché non immagino la mia vita senza questo libro. È uno step necessario; un passo verso la quasi maturità che andava fatto; che mi ha aiutato a crescere: le pagine che sfogli-erete raccontano di questa condizione. L'ha scritto un ventenne, quando ancoraventi anni non li aveva. Ci saranno concerti all'interno, concetti, paranoie, dilemmi esistenziali, fotografie di un mondo triste ma reale; anche la più pura felicità e la più alta forma di fede (verrei solo per vedere i vostri volti umidi /farmi forza fino a ridere di speranza). Spero, appunto, possa piacervi. Questo libro sono io che mi dono: una parte di me se ne va eternamente. E mi sento più leggero che quasi dimagrisco.

**Rethinking Migration and Return in Southeastern Europe**  
Routledge

Over the past few decades, the world economy has undergone

radical transformations, in part connected to the expansion of the 'digital economy', in part to the growing interconnection via the internet of the world of objects and physical processes. This 'great transformation' poses the dilemma on the capitalism's ability to reconcile economic and social value, keeping together economic well-being, social cohesion and political freedom. The Economy of Collaboration can offer a contribution in this direction but requires courageous policies to mediate the various interests at stake, as well as to rethink and make more sustainable its development, by increasing the benefits not only for businesses but also for workers and consumers. In short, to create shared value. This book refers to a mode of organizing the production, distribution and consumption of goods and services based on cooperative relations. The main reference is to activities linked to the digital economy, since they are the emerging forms of a definitely older phenomenon, but which is expanding on an ever-wider scale thanks to new technologies. These collaborative activities can be regulated differently, along a continuum that ranges from the pole of market exchanges to that of generalized reciprocity, with various intermediate mixed forms.

This book provides an important new analytical framework for making sense of return, remigration and circular mobility, conceptualising them as different phases of a wider migration process. Using an in-depth case study of Albania and its two main destination countries, Italy and Greece, the book demonstrates that instead of being viewed as a linear path between origin and destination, migration should be seen as a segmented, or cyclical pattern that may involve several localities and more than two countries. Characterised by important previous historical, social, economic and political linkages, geographical proximity but also high migration volatility and sustained flows in either directions, Albanian migration to Italy and Greece offers an optimal case study for analysing complex return, reintegration and mobility processes. While interesting as a unique regional migration system, the lessons learned cast light on important migration and mobility dynamics that are relevant for labour migration in Europe, also from other important migrant origin countries in the EU's neighbourhood such as for instance Morocco or the Ukraine. This rich theoretical and empirical study will be of interest to researchers within European Studies and Migration Studies, as well as providing a useful contribution to policy debates on how to govern return migration, reintegration and circular migration. Psicologia e neuroscienze: due scienze contingenti, intrecciate, nella misura in cui la spiegazione dei comportamenti umani è legata indissolubilmente al substrato neurale che permette (o compromette) la percezione, l'ideazione, l'emotività e la pianificazione delle azioni. In un'ottica di descrizione delle funzioni psichiche di base e di etiopatogenesi e trattamento dei disturbi mentali, nelle loro connotazioni tipiche e atipiche, e utilizzando un approccio multidisciplinare che integra medicina, psicologia e scienze sociali, Minidictionary of Psychology, Criminology and Neuroscience fornisce un panorama aggiornato del funzionamento psichico, in un formato originale che usufruisce della potenza dell'immagine per veicolare agevolmente e sinteticamente nozioni complesse e affascinanti quali i paradossi della mente.

L'opera dedicata al Best interest of the child, nasce dal desiderio di indagare il contenuto di una formula che, benché universalmente declamata e conosciuta nel moderno diritto minorile, sia a livello dell'ordinamento interno che dell'ordinamento europeo ed internazionale, si rivela suggestiva proprio perché caratterizzata da un'ontologica vaghezza. L'incertezza in ordine al contenuto e alle applicazioni concrete di questa formula, insieme alla consapevolezza della sua incontestabile utilità, hanno sollecitato l'interesse per quella che si è rivelata una vera e propria sfida. Si è reso così necessario un confronto corale tra tutte le discipline e tra numerosi operatori professionali che sono stati chiamati a dialogare sulle molteplici applicazioni di questa formula. L'opera, che presenta un carattere interdisciplinare e comparatistico, si articola in tre tomi e in nove parti che racchiudono i molteplici profili applicativi. L'opera, al di là dei risultati, è l'espressione di un metodo che non si contenta

delle formule verbali ma ne ricerca le applicazioni concrete, in omaggio al principio di effettività, nella ricerca di un dialogo costante tra dottrina, giurisprudenza, legislatore ed esponenti delle varie professioni. La pubblicazione dell'opera è lo strumento privilegiato per mantenere vivo il ricordo di un bellissimo Convegno che ha avuto luogo in tre giornate alla Sapienza e che ha visto la partecipazione di molti studiosi del diritto di famiglia e dei minori.

In view of the fact that public infrastructure, health and other services are being more consistently delivered through Public-Private Partnerships (PPPs) and concessions; this timely book explores these complex contractual arrangements involving cooperation between public and private sectors. It considers that PPPs have become increasingly prevalent following the financial crisis and examines the applicable legal regimes that are still, to a large extent, unclear to many.

*Emotion Regulation for Young People with Eating Disorders* is a supportive guide for professionals to help them build effective therapeutic relationships with young people struggling with eating disorders. The book focuses on the role of emotion regulation in the development and maintenance of eating disorders. The psychological concepts discussed are an integration of ideas and theories that have been proposed by many psychologists over the last half-century. The tasks presented in the book use aspects of these theories and concepts in an applied way which can be helpful to enable young people to understand more about their emotional experience and how it has contributed to their difficulties. The approach proposed can be used across the spectrum of eating disorders as the dysfunctional emotional regulation difficulty is shared by all eating disorders. The workbook will be helpful for Children and Adolescent Mental Health Services (CAMHS) professionals such as psychiatrists, psychologists, counsellors, nurses, occupational therapists, dieticians and therapeutic care workers.

What can Italy teach us about our relationships with the nonhuman world in the current socio-environmental crisis? 'Italy and the Ecological Imagination: Ecocritical Theories and Practices' focuses on how Italian writers, activists, visual artists, and philosophers engage with real and fictional environments and how their engagements reflect, critique, and animate the approach that Italian culture has had toward the physical environment and its ecology since late antiquity. Through a comparative and interdisciplinary approach, the essays collected in this volume explore topics including climate change, environmental justice, animal ethics, and socio-environmental degradation to provide a cogent analysis of how Italian ecological narratives fit within the current transnational debate occurring in the Environmental Humanities. The aim of 'Italy and the Ecological Imagination' is thus to explore non-anthropocentric modes of thinking and interacting with the nonhuman world. The goal is to provide accounts of how Italian historical records have potentially shaped our environmental imagination and how contemporary Italian authors are developing approaches beyond humanism in order to raise questions about the role of humans in a possible (or potentially) post-natural world. Ultimately, the volume will offer a critical map of Italian contributions to our contemporary investigation of the relationships between human and nonhuman habitats and communities.

Following a national referendum on 23rd June 2016, the UK announced its intention to end its decades-long membership of the EU, perhaps the most dramatic and important change in national policy since 1945. That decision initiated a process of complex negotiations aimed at making the arrangements

required for an "orderly Brexit". The UK's Withdrawal from the EU explores the UK's departure from the EU from a legal perspective: Michael Dougan provides a critical analysis of the final EU-UK Withdrawal Agreement, including explorations of the future protection of citizens' rights, the border between Ireland and Northern Ireland, and the prospects for future EU-UK relations in fields such as trade and security. These explorations also include an analysis of the primary problems that arose during the Brexit negotiation process and various constitutional principles relevant to EU withdrawal law.

National development banks (NDBs) have transformed from outdated relics of national industrial policy to central pillars of the European Union's economic project. This trend, which accelerated after the Financial Crisis of 2007, has led to a proliferation of NDBs with an expanded size and scope. However, it is surprising that the EU — which has championed market-oriented governance and strict competition policy — has actually advocated for an expansion of NDBs. This book therefore asks, Why has the EU supported an increased role for NDBs, and how can we understand the dynamics between NDBs and European incentives and constraints? To answer these questions, the contributing authors analyze the formation and evolution of a field of development banking within the EU, identifying a new field around an innovative conceptualization of state-backed financing for the purposes of policy implementation. Yet rather than focusing solely on national development banks, the authors instead broaden the focus to the entire ecosystem of the field of development banking, which includes political institutions (both in Brussels and in the member states), financing vehicles (such as the Juncker Plan), regulatory bodies (Directorate-General for Competition, Directorate-General for Economic and Financial Affairs), and commercial actors. Seven in-depth case studies on European NDBs, along with three chapters on European-level actors, detail this field of development banking, and answer the questions of when, where, and how development banking occurs within the EU.

The nine chapters in this book explore how the Italian education system responded to distance learning during the first wave of the pandemic. The impact of the hard lockdown on both teaching and learning revealed the inherent weaknesses of a system in which digital technology had only recently been introduced and highlighted the relevant inequalities in their access and use.

Saint Catherine of Siena (1347-1380) has become a defining figure in the history of medieval religion and one of the main exemplars of the "feminine turn" in late medieval religious culture. Despite a hagiographical tradition and historiography that has placed Catherine at a mystic remove from the politics of her day, Catherine's public authority was shaped by politics, both locally in Siena and broadly within late-fourteenth-century contests between the papacy and the Republic of Florence for hegemony in central Italy. In *The Sainthood of Catherine of Siena*, F. Thomas Luongo combines literary-critical readings of Catherine's letters—she was the author of one of the largest collections of medieval letters—with political and social analysis. Drawing on a wide range of archival sources, Luongo investigates how Catherine's spiritual authority and sanctity were linked with contemporary political and cultural developments. He shows how the political situation of the church in Italy and a culture that privileged female spirituality and prophetic speech facilitated Catherine's emergence into a public role. The Catherine who emerges from Luongo's well-written pages is a splendid example of what can result when a historian asks fresh questions about a familiar figure's life and brings new materials and methods to bear in formulating answers. *The Sainthood of Catherine of Siena* offers a woman more complex and interesting than the figure portrayed in most contemporary scholarship.

Sustainable investments, although not yet working under a comprehensive regulatory framework, represent a growing, worldwide phenomenon. Such growth reflects the renewed public and private interest in environmental issues such as climate change, poverty and financial inclusion, as well as growing support from conscious investors looking to finance environmental and social initiatives. However, despite the interest that sustainable investments are gaining among governors, investors and practitioners, important challenges remain that must be addressed. Comprising a collection of research presented at the 2nd Social Impact Investments International Conference, this contributed volume offers a global analysis of the current state of the sustainable finance sector, proposing solutions to challenging obstacles and exploring topics including impact investing, social impact bonds and green banking. Providing real-life case studies from Europe, Latin America and Africa, this book is an insightful and timely read for scholars interested in sustainable finance, social impact investing, development finance

and alternative finance.

**Children's Lives in Southern Europe** Routledge

The studies in this book focus on factors that challenge the developmental paths of adolescents. The themes are: online experience (i.e., the overuse of screens, the proliferation of inappropriate videos, or parental pressures for children to remain always connected), the difficulties of pandemic times (i.e., coping with anxiety or illness), and two conditions of great fragility (that of being a migrant refugee minor, or an adolescent with severe mental disorder). These topics illustrate the multiple adolescent development pathways that inspire the plural title of the volume: *Adolescences*. Each author suggests protective factors (personal, family, educational, and friendship-related) that can contribute to promoting a healthy developmental outcome.

Whilst corruption and organized crime have been widely researched, they have not yet been specifically linked to sport. *Corruption, Mafia Power and Italian Soccer* offers an original insight into this new research area. Adopting a psycho-social approach based mainly on Pierre Bourdieu's praxeology, the book demonstrates that corruption and the mafia presence in Italian soccer reflect the Italian socio-political and economic system itself. Supported by interviews with security agency officials, anticorruption organisations and antimafia organisations, and analysing empirical data obtained from a case study of 'Operation Dirty Soccer', this important study explains why mafia groups are involved in soccer, what the links are to political corruption and what might be done to control the problem. It also examines the mechanisms that make it possible for mafia groups and affiliates to enter the football industry and discusses how mafia groups exploit and corrupt Italian football. This is important reading for undergraduate and postgraduate students, researchers and academics working in the areas of sociology, criminology, policing, anthropology, the sociology of sport, sport deviance, sport management and organised crime. It is also a valuable resource for practitioners in the football industry.
