The 10th edition of Porth's Pathophysiology: Concepts of Altered Health States continues a legacy of excellence by providing comprehensive, nursing-focused coverage designed to help grasp both the physical and psychological aspects of altered health. The book's unique emphasis on "concepts" of altered health states, as opposed to factual descriptions of diseases and disorders, helps students grasp both the physical and psychological aspects of altered health. Porth's Pathophysiology: Concepts of Altered Health States Tenth Edition Tommie L. Norris, DNS, RN Meet today's clinical challenges with the trusted authority in pathophysiology Make the most of your pathophysiology course and master the knowledge to ensure clinical success. Trusted for more than 30 years and updated to reflect today's nursing challenges, this engaging text makes complex concepts accessible and helps you easily and confidently grasp normal body function, the effects of disease on body systems, and the body's ability to compensate and adapt. This edition also considers the many technological advances that allow healthcare providers to diagnose earlier and with more accuracy. Highlights of the Tenth Edition Approachable presentation builds understanding from basic to advanced concepts and defines key terms as you progress. "Chunked" content keeps you focused on the most critical information and helps you review salient points efficiently. Unit-Opening Case Studies, which are revisited in one or more chapters in the unit, bring pathophysiology to life and equip you for success in clinical practice. Approximately 1,000 vibrant illustrations clarify the clinical manifestations of diseases and disease processes. Understanding boxes break physiologic processes and phenomena into their sequential parts, providing insight into the many opportunities for disease to disrupt the processes. Key Points boxes and In Summary sections reduce the need for memorization and help you incorporate important points into broader conceptual units.

NEW! Pediatric Considerations and Geriatric Considerations boxes in each chapter specify how the chapter content applies to these two special populations. NEW! Concept Mastery Alerts explain topics that students can find confusing. Review Exercises at the end of each chapter test your retention and identify areas for further study. References provide fast, efficient access to normal laboratory values in both conventional and SI units, as well as a comprehensive glossary. Narrated animations referenced by icons in the text and available online enhance your understanding of the most challenging and clinically relevant concepts.

A farcical look at political violence as it's played out during the Troubles in Northern Ireland against the drab backdrop of a bare, rustic Irish cottage and unending boredom in an inhospitable environment in which a mutilated cat sets off a murderous cycle of revenge. Wee Thomas was a friendly cat. He would always say hello to you were you to see him sitting on a wall. (Pause.) He won't be saying hello no more, God bless him. Not with that lump of a brain gone. Who knocked Wee Thomas over on the lonely road on the island of Inishmore, and was it an accident? "Mad Padraig" will want to know when he gets back from a stint of torture and chip shop bombing in Northern Ireland: he loves that cat more than life itself.

I think we accepted it at Rattlers Ridge without question. The matter of ownership was more difficult to settle; and although the dog I have in my mind at the present writing attached himself impartially and equally to everyone in camp, no one ventured to exclusively claim him; while, after the perpetration of any canine atrocity, everybody repudiated him with indignant haste.

Mandel 1e is one of the first books on the market to be constructed "from the ground up" specifically for the 1-term survey course. Unlike most books in this market that are simply watered-down versions of existing Principles texts, Mandel 1e is written especially for the survey course, and designed for students who will not go on to take other econ courses. Mike Mandel, Chief Economist for BusinessWeek magazine, has written Economics: The Basics, 1e in a journalistic style, drawing upon BusinessWeek articles and experience throughout the text to deliver the basics of economics and develop a students' economic literacy. Mandel's current examples, journalistic writing style and accessible math will help instructors overcome the common challenges of this course, and make the material more approachable and attractive to students.

Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.

PRINCIPLES OF MASS TRANSFER Vintage

This book addresses the specific needs of undergraduate chemical engineering students for the two courses in Mass Transfer I and Mass Transfer II. It is also suitable for a course in Downstream Processing for biotechnology students. This self-contained textbook is designed to provide single-volume coverage of the full spectrum of techniques for chemical separations. The operations covered include vapour distillation, fluid adsorption, gas absorption, liquid extraction, solid leaching, gas humidification, solid drying, foam separation, solution crystallization, metal alloying, reverse osmosis, molecular sieves, electro dialysis, and ion exchange. The text also discusses emerging applications such as drug delivery, gel electrophoresis, bleaching, membrane separations, polymer devolatilization, solution crystallization, and gas chromatography. Equipment selection is discussed for different operations. A table of industrial applications for each and every mass transfer unit operation is provided. The worked examples illustrate problems from chemical process and biotechnology industries. Review questions encourage critical thinking, and end-of-chapter problems emphasize grasping of the fundamentals as well as illustrate applications of theory to a wide variety of scenarios. "I have been teaching nonmajors biology at the University of Oklahoma since 1997 and over that time have encountered many students who fear science in general and biology in particular. The complexity, abstractions, and unfamiliar terms can seem overwhelming at first, but with practice, I know that anyone can think like a scientist. Learning to think scientifically is important well beyond passing your biology class. After all, scientific issues confront you every day as you navigate your life and your social media accounts. How do you know if a claim about climate change is scientific? Will you be able to identify misinformation and interpret graphs during the next global health crisis? This book will teach you not only to understand the scientific terms you encounter but also to distinguish "good science" from unscientific claims. I've created the following features to help you make the transition from memorizing facts to understanding concepts-from accepting scientific claims to analyzing them for yourself. These tools will help you to pass your class and to be an informed citizen"--
