MILLS SCHMITT

New York Magazine Teacher Created Resources

With recipes for gumbos and stews, plus okra pickles, tofu, marshmallow, paper, and more Chris Smith's first encounter with okra was of the worst kind: slimy fried okra at a greasy-spoon diner. Despite that dismal introduction, Smith developed a fascination with okra, and as he researched the plant and began to experiment with it in his own kitchen, he discovered an amazing range of delicious ways to cook and eat it, along with ingenious and surprising ways to process the plant from tip-to-tail: pods, leaves, flowers, seeds, and stalks. Smith talked okra with chefs, food historians, university researchers, farmers, homesteaders, and gardeners. The summation of his experimentation and research comes together in *The Whole Okra*, a lighthearted but information-rich collection of okra history, lore, recipes, craft projects, growing advice, and more. *The Whole Okra* includes classic recipes such as fried okra pods as well as unexpected delights including okra seed pancakes and okra flower vodka. Some

of the South's best-known chefs shared okra recipes with Smith: Okra Soup by culinary historian Michael Twitty, Limpin' Susan by chef BJ Dennis, Bhindi Masala by chef Meherwan Irani, and Okra Fries by chef Vivian Howard. Okra has practical uses beyond the edible, and Smith also researched the history of okra as a fiber crop for making paper and the uses of okra mucilage (slime) as a preservative, a hydrating face mask, and a primary ingredient in herbalist Katrina Blair's recipe for Okra Marshmallow Delight. *The Whole Okra* is foremost a foodie's book, but Smith also provides practical tips and techniques for home and market gardeners. He gives directions for saving seed for replanting, for a breeding project, or for a stockpile of seed for making okra oil, okra flour, okra tempeh, and more. Smith has grown over 75 varieties of okra, and he describes the nuanced differences in flavor, texture, and color; the best-tasting varieties; and his personal favorites. Smith's wry humor and seed-to-stem enthusiasm for his subject infuse every chapter with just the right mix of fabulous recipes and culinary tips, unique projects, and fun facts about this vagabond vegetable with enormous potential.

Annual Report of the Secretary of the Navy PRUFROCK PRESS INC.

Week-long units for each letter of the alphabet reinforce developing literacy skills. Read-aloud activities, songs, centers, and snacks provide connections to language arts, math, science, and social studies concepts. Teach these stand-alone units in order, or flow from one theme to the next!

Annual Reports of the Navy Department for the Fiscal Year ... Amberley Publishing Limited

Picture books have a unique and distinctive quality; they are both a literary joy and a visual delight. These unique units are designed to integrate literature, thinking skills, and the creative arts using Bloom's taxonomy and Gardner's Multiple Intelligences.

Grades 4-8

Routledge Library Editions: Cultural Studies Routledge

Written by feminist scholars over a period of nearly thirty years, the selected readings are wide-ranging in content, offer a multi-ethnic and multi-cultural perspective, and reflect the work of scholars working within religious studies as well as other disciplines. The introductory essays link the sections and are packed with useful information on resources, issues, and the current debates. The book illustrates how debates about feminism within the study of religions have been impacted by broader theoretical discussions and provides evidence that feminist scholars working on religion have made their own contribution to feminist theory.

Continuum Encyclopedia of Native Art Chelsea Green Publishing

This seven volume set reissues a collection of out-of-print titles covering a range of responses to modern culture. They include in-depth analyses of US and

Australian popular culture, works on the media and television, macrosociology, and the media and 'otherness'. Taken together, they provide stimulating and thought-provoking debate on a wide range of topics central to many of today's cultural controversies.

Story Celebrations Twinkl

The central purpose of this book is to help change the terms of the debate on animism, a classic theme in anthropology. It combines some of the finest ethnographic material currently available (including firsthand research on the Chachi of Ecuador) with an unusually broad geographic scope (the Americas, Asia, and Africa). Edward B. Tylor originally defined animism as the first phase in the development of religion. The heyday of cultural evolutionism may be over, but his basic conception is commonly assumed to remain valid in at least one respect: there is still a broad consensus that everything is alive within animism, or at least that more things are alive than a modern scientific observer would allow for (e.g., clouds, rivers, mountains) It is considered self-evident that animism is based on a kind of exaggeration: its adherents are presumed to impute life to this, that and the other in a remarkably generous manner. Against the prevailing consensus, this book argues that if animism has one outstanding feature, it is its peculiar restrictiveness. Animistic notions of life are astonishingly uniform across the globe, insofar as they are restricted rather than exaggerated. In the modern Western cosmology, life overlaps with the animate. Within animism, however, life is always conditional, and therefore tends to be limited to one's kin, one's pets and perhaps the plants in one's garden. Thus it emerges that "our" modern biological

concept of life is stranger than generally thought.

Contemporary Books

Seven decades after World War II, we now know that the margin between Allied victory and defeat was often narrower than many realized. The decisive actions of leaders, generals and war heroes have been well documented, but less well known are the technological developments that made victory possible and laid the groundwork for postwar progress. Based on more than ten years of research, this book describes how American airmen became the best-outfitted aviators of the war, tracing the development of virtually every piece of personal equipment used by United States air forces. Drawing on original sources including formerly classified documents, the author details the myriad types of respirator equipment, parachutes, body armor, pressure suits and other flying and survival gear that were instrumental in making U.S. pilots and air crews effective. Personal anecdotes bring to life the design and testing of combat flight equipment. More than 160 photographs are included, most published here for the first time.

Kirkus Reviews Milkweed Editions

Adult books are categorized by genre (i.e., fiction, mystery, science fiction, nonfiction). Along with bibliographic information, the expected date of publication and the names of literary agents for individual titles are provided. Starred reviews serve several functions: In the adult section, they mark potential bestsellers, major promotions, book club selections, and just very good books; in the children's section, they denote books of very high quality. The unsigned reviews manage to be discerning and

sometimes quite critical.

The Medical Aspects of Chemical

Warfare Delmar

Wartime Britain through the eyes of children who were there.

Using Picture Books with Older Students

New Providence, N.J. : R.R. Bowker

This anthology on otherness and the media, first published in 1993, was prompted by the proliferation of writings centring on issues of 'difference', 'diversity', 'multiculturalism', 'representation' and 'postcolonial' discourses. Such issues and discourses question existing canons of criticism, theory and cultural practice but also because they suggest a new sense of direction in theorisation of difference and representation.

Book Links Allyn & Bacon

The helmet-shaped mapiko masks of Mozambique have garnered admiration from African art scholars and collectors alike, due to their striking aesthetics and their grotesque allure. This book restores to mapiko its historic and artistic context, charting in detail the transformations of this masquerading tradition throughout the twentieth century. Based on field research spanning seven years, this study shows how mapiko has undergone continuous reinvention by visionary individuals, has diversified into genres with broad generational appeal, and has enacted historical events and political engagements. This dense history of creativity and change has been sustained by a culture of competition deeply ingrained within the logic of ritual itself. The desire to outshine rivals on the dance ground drives performers to search for the new, the astonishing, and the topical. It is this spirit of rivalry and one-upmanship that keeps mapiko attuned to the times that it traverses. In

Step with the Times is illustrated with vibrant photographs of mapiko masks and performances. It marks the most radical attempt to date to historicize an African performative tradition.
