Computer algebra systems are gaining importance in all areas of science and engineering. This textbook gives a thorough introduction to the algorithmic basis of the mathematical engine in computer algebra systems. It is designed to accompany one- or two-semester courses for advanced undergraduate or graduate students in computer science or mathematics. Its comprehensiveness and authority also make it an essential reference for professionals in the area. Special features include: detailed study of algorithms including time analysis; implementation reports on several topics; complete proofs of the mathematical underpinnings; a wide variety of applications (among others, in chemistry, coding theory, cryptography, computational logic, and the design of calendars and musical scales). Some of this material has never appeared before in book form. For the new edition, errors have been corrected, the text has been smoothed and updated, and new sections on greatest common divisors and symbolic integration have been added.

Si l'on connaît bien les relations entre Flaubert et Maupassant, on méconnaît celles que tous deux ont entretenues avec le poète Alfred Le Poittevin. Oncle de Maupassant et grand ami de Flaubert, le trio est uni par de puissants liens et une passion commune, la littérature. Les contributions, issues du colloque, mettent en lumière la place et le rôle de Maupassant au sein de cette triangulation, éclairant également chacun des pôles de cette figure.

Estética y teoría del arte son disciplinas -y actividades- que desarrollan su marco teórico en el Siglo de las Luces, en estrecho contacto con la historia y la crítica de arte, con la progresiva difusión y popularización de las obras en salones y exposiciones, el auge del periodismo, etc. Fenómenos que hoy son cotidianos tuvieron entonces su punto de partida e incidieron de manera decisiva en la configuración de las diferentes teorías. Este primer volumen de la Historia de las ideas estéticas y de las teorías artísticas contemporáneas analiza ese proceso tal como se produjo a lo largo de los siglos xviii y xix, procurando destacar los momentos, temas y autores que constituyen sus ejes fundamentales y relacionando aspectos que son tratados habitualmente de forma independiente. El resultado es una historia que propone, también, una concepción de la estética y la teoría del arte diferente de la habitual. En este primer volumen de la Historia de las ideas estéticas y de las teorías artísticas contemporáneas se abordan los principales problemas y se analiza a los más destacados autores en este campo. Se inicia con un análisis de los importantes cambios habidos en el siglo xviii, en especial el desarrollo de la estética empirista y el movimiento ilustrado, pero también las teorías arquitectónicas y fenómenos como el de la crítica de arte y el desarrollo de los salones. Los autores fundamentales para la comprensión de la historia de la estética son motivo de una especial atención: Kant, Addison, Burke, Hume, etcétera. *Allgemeine Bibliographie Der Staats- und Rechtswissenschaften* Springer
Based on extensive archival research, this book is the first wide-ranging analysis of how memories of the Franco-Prussian War shaped French political culture and identities. Examining war remembrance as an emerging mass phenomenon in Europe, it sheds new light on the relationship between memories and the emergence of new concepts of the nation. *Biographie Universelle Classique. This work is an attempt to reveal to the English-speaking reader the development of the French brand of Romanticism. The 30-year surge toward a new aesthetic involved a complex series of actions and reactions by groups and individuals which has fascinated philosophers, historians and literary critics because political bias created strange allegiances and pronouncements. The classical diehards sought to define romanticism in order to oppose it, and the romantic innovators pursued the same goal in order to understand it and provide illustrations of it. Since many theoretical statements and creative works were reproduced and reviewed in the magazines and newspapers of the day, this book especially focuses on the major periodicals to describe the quest for aesthetic freedom.
