The three concepts mentioned in the title of this volume imply the contact between two or more literary phenomena; they are based on similarities that are related to a form of 'travelling' and imitation or adaptation of entire

texts, genres, forms or contents. Transfer comprises all sorts of 'travelling', with translation as a major instrument of transferring literature across linguistic and cultural barriers. Transfer aims at the process of communication, starting with the source product and its cultural context and then highlighting the mediation by certain agents and institutions to end up with inclusion in the target culture. Reception lays its focus on the receiving culture, especially on criticism, reading, and interpretation. Translation, therefore, forms a major factor in reception with the general aim of reception studies being to reveal the wide spectrum of

interpretations each text offers. Moreover, translations are the prime instrument in the distribution of literature across linguistic and cultural borders; thus, they pave the way for gaining prestige in the world of literature. The thirty-eight papers included in this volume and dedicated to research in this area were previously read at the ICLA conference 2016 in Vienna. They are ample proof that the field remains at the center of interest in Comparative Literature.

Arts poétiques de la Renaissance transcript Verlag

Devant la menace qui pèse sur les futurs communs de l'humanité et de la planète Terre, il est devenu urgent

d'entreprendre une action commune pour changer de cap et repenser nos futurs. Reconnue de longue date comme une puissante force au service de transformations positives, l'éducation est investie d'une mission nouvelle, urgente et essentielle. Le présent rapport, le fruit d'un travail de deux années, invite les gouvernements, les institutions, les organisations et les citoyens à travers le monde à élaborer un nouveau contrat social pour l'éducation qui nous aidera à construire, des futurs pacifiques, justes et durables.

Preuves Librairie Droz
Spatial and identity

research operates with differentiations and relations. These are particularly useful heuristic tools when examining border regions where social and geopolitical demarcations diverge. Applying this approach, the authors of this volume investigate spatial and identity constructions in cross-border contexts as they appear in everyday, institutional and media practices. The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation. The studies base upon empirical surveys

conducted in Germany, France, Belgium and Luxembourg.
