Lo! A mighty prophet of the unexplained has come forward to search out the truth

and light the way for mankind! It's the end of the 19th century and the city of New York has been plagued by fish falling from the sky, strange lights in the night, bizarre collections of microbial goo, and vanishing citizens! It's up to one man to expose the truth behind these events... Charles Fort! A mild mannered librarian by day, Fort seeks out the truth and exposes the bizarre to the light of day!

Wild Talents Library of Alexandria
At the dawn of the 20th century some of the best known and greatest literary adventurers from the likes of H.G. Wells, Jules Verne, Arthur Conan Doyle, Edgar Rice Burroughs, and H Rider Haggard were created. Sherlock Holmes, 20,000 Leagues Under the Sea, The Invisible Man, Journey to the Center of the Earth,

The Time Machine, The Island of Dr. Moreau. All thought to be the work of pure fiction over the years by the public. However Charles Fort, the famous collector of all things bizarre and supernatural, had discovered an ancient book that when opened manifests the ideas in one's mind into reality. And in the presence of these great writers the world as we know it was changed forever. Now, a century later, the descendants of those famous adventurers are recruited by the legendary Professor Challenger in order to stop in order to stop the book from being opened again...and irreversibly changing the present. "Searchers is the comic book I have on the wall with a sign reading - 'Love books? Never read a comic? Try this one!money back

guarantee..." - Dark Star Books.
"Searching for an exhilarating and original concept in a comic book? Look no further, because Searchers is here!" - Claude's Comics. "Long before League of Extraordinary Gentleman came along, Caliber's Searchers had introduced the great concept of bringing these fictional characters to reality." - Psycho Comics.

Charles Sumner and the Coming of the Civil War Penguin

"Rich and riveting, complex and compelling, powerful and poetic."—Peter M. Gianotti, *Newsday* In Odessa, the greatest port on the Black Sea, a dream of cosmopolitan freedom inspired geniuses and innovators, from the writers Alexander Pushkin and Isaac Babel to Zionist activist Vladimir Jabotinsky and immunologist Ilya

Mechnikov. Yet here too was death on a staggering scale, as World War II brought the mass murder of Jews carried out by the city's Romanian occupiers. Odessa is an elegy for the vibrant, multicultural tapestry of which a thriving Jewish population formed an essential part, as well as a celebration of the survival of Odessa's dream in a diaspora reaching all the way to Brighton Beach.

What are the roots of today's militant fundamentalism in the Muslim world? In this insightful and wide-ranging history, Charles Allen finds an answer in an

eighteenth-century reform movement of Muhammed ibn Abd al-Wahhab and his followers-the Wahhabi-who sought the restoration of Islamic purity and declared violent jihad on all who opposed them. The Wahhabi teaching spread rapidly-first throughout the Arabian Peninsula, then to the Indian subcontinent, where a more militant expression of Wahhabism flourished. The ranks of today's Taliban and al-Qaeda are filled with young men trained in Wahhabi theology. God's Terrorists sheds much-needed light on the origins of modern terrorism and shows how this dangerous ideology lives on today.

Most scholars dismiss research into the paranormal as pseudoscience, a

frivolous pursuit for the paranoid or gullible. Even historians of religion, whose work naturally attends to events beyond the realm of empirical science, have shown scant interest in the subject. But the history of psychical phenomena, Jeffrey J. Kripal contends, is an untapped source of insight into the sacred and by tracing that history through the last two centuries of Western thought we can see its potential centrality to the critical study of religion. Kripal grounds his study in the work of four major figures in the history of paranormal research: psychical researcher Frederic Myers; writer and humorist Charles Fort; astronomer, computer scientist, and ufologist Jacques Vallee; and philosopher and sociologist Bertrand Méheust. Through incisive analyses of these

thinkers, Kripal ushers the reader into a beguiling world somewhere between fact, fiction, and fraud. The cultural history of telepathy, teleportation, and UFOs; a ghostly love story; the occult dimensions of science fiction; cold war psychic espionage; galactic colonialism; and the intimate relationship between consciousness and culture all come together in *Authors of the Impossible*, a dazzling and profound look at how the paranormal bridges the sacred and the scientific.

When it comes to pop culture, Alfred Bester (1913-1987) is something of an unsung hero. He wrote radio scripts, screenplays, and comic books (in which capacity he created the original Green Lantern Oath). But Bester is best known for his science-fiction novels, and *The Stars My Destination* may be his finest creation. With its sly*

potshotting at corporate skullduggery, *The Stars My Destination* seems utterly contemporary, and has maintained its status as an underground classic for fifty years. (Bester fans should also note that iBooks has reprinted *ReDemolished*, which won the very first Hugo Award in 1953.)

Authors of the Impossible Library of Alexandria

The "Nine Unknown Men" are a fictional secret society founded by the Mauryan Emperor Asoka around 270 BC to preserve and develop knowledge that would be dangerous to humanity if it fell into the wrong hands. The nine men are embodiment of good and face up against nine Kali worshippers, who sow confusion and masquerade as the true sages. The story surrounds a priest

called Father Cyprian who is in possession of the books but who wants to destroy them out of Christian piety, and a number of other characters who are interested in learning their contents. The nine books entrusted to the Nine Unknown contain information on (1) Propaganda and Psychological warfare, (2) Physiology, including secrets concerning the "touch of death", (3) Microbiology, (4) Alchemy, (5) Communication, including communication with extraterrestrials, (6) Gravity, and anti-gravity devices (Vimanas, mythological flying machines of ancient India), (7) Cosmology, including hyperspace and time-travel, (8) Light, and a technology capable of modifying the speed of light and (9) Sociology, including rules predicting the

rise and fall of empires.

Pull back the curtain on the real history of magic – and discover why magic really matters. If you read a standard history of magic, you learn that it begins in ancient Egypt, with the resurrection of a goose in front of the Pharaoh. You discover how magicians were tortured and killed during the age of witchcraft. You are told how conjuring tricks were used to quell rebellious colonial natives. The history of magic is full of such stories, which turn out not to be true. Behind the smoke and mirrors, however, lies the real story of magic. It is a history of people from humble roots, who made and lost fortunes, and who deceived kings and queens. In order to survive, they concealed many secrets, yet they

revealed some and they stole others. They engaged in deception, exposure, and betrayal, in a quest to make the impossible happen. They managed to survive in a world in which a series of technological wonders appeared, which previous generations would have considered magical. Even today, when we now take the most sophisticated technology for granted, we can still be astonished by tricks that were performed hundreds of years ago. The Secret History of Magic reveals how this was done. It is about why magic matters in a world that no longer seems to have a place for it, but which desperately needs a sense of wonder.

'Now, what I want is, Facts. Teach these boys and girls nothing but Facts. Facts

alone are wanted in life. Plant nothing else, and root out everything else.’ Coketown is dominated by the figure of Mr Thomas Gradgrind, school owner and model of Utilitarian success. Feeding both his pupils and his family with facts, he bans fancy and wonder from young minds. As a consequence his young daughter Louisa marries the loveless businessman and “bully of humility” Mr Bounderby, and his son Tom rebels to become embroiled in gambling and robbery. And, as their fortunes cross with those of free-spirited circus girl Sissy Jupe and victimized weaver Stephen Blackpool, Gradgrind is eventually forced to recognize the value of the human heart in an age of materialism and machinery. This edition of *Hard Times* is based on the text of the

first volume publication of 1854. Kate Flint’s introduction sheds light on the frequently overlooked character interplay in Dickens’s great critique of Victorian industrial society. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

"Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's Book of the Damned was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science.

Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare

time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you"--Taken from Good Reads website.

Charles Munger is Warren Buffett decade's long business partner, and his investment filter, jokingly called by Mr. Buffett - the abominable no man. The early pages cover Munger's family history, his framework for investing [wait for the fat pitches, and assess each opportunity using rational, rigorous frameworks drawn from multiple

disciplines (and not finance theory!)], and even some warm testaments from family, friends and colleagues. The next section, assembled by leading investor Whitney Tilson, is well edited and benefits from Tilson's massaging of quotations made over time into logical sub-headings. The bulk of the text though is, as the subtitle suggests, the wit and wisdom of Mr. Munger as conveyed through various speeches in the last couple decade or so before 2006.

This book traces the origins of a faith--perhaps the faith of the century. Modern revolutionaries are believers, no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century, and

became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries--the innovative creators of a new tradition. His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century. The theater was Europe of the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg. Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to

political practice was essentially the work of three Russian revolutions: in 1905, March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors, people who preached social justice transcending traditional national, ethnic, and gender boundaries. When this book originally appeared The New Republic hailed it as "remarkable, learned and lively," while The New Yorker noted that Billington "pays great attention to the lives and emotions of individuals and this makes his book

absorbing." It is an invaluable work of history and contribution to our understanding of political life.

The #1 New York Times bestselling classic frontier adventure novel that inspired two award-winning films! Charles Portis has long been acclaimed

as one of America's foremost writers. True Grit, his most famous novel, was first published in 1968, and became the basis for two movies, the 1969 classic starring John Wayne and, in 2010, a new version starring Academy Award® winner Jeff Bridges and written and directed by the Coen brothers. True Grit tells the story of Mattie Ross, who is just fourteen when the coward Tom Chaney shoots her father down in Fort Smith, Arkansas, and robs him of his life, his horse, and \$150 in cash. Mattie leaves home to avenge her father's blood. With one-eyed Rooster Cogburn, the meanest available U.S. Marshal, by her side, Mattie pursues the killer into Indian Territory. True Grit is eccentric, cool, straight, and unflinching, like Mattie herself. From a writer of true status, this

is an American classic through and through.
