Bloomsbury Publishing
In any society,

communicative activities are organized into models of conduct that differentiate specific social practices from each other and enable people to communicate with each other in ways distinctive to those practices. The

articles in this volume investigate a series of locale-specific models of communicative conduct, or registers of communication, through which persons organize their participation in varied social practices,

including practices of politics, religion, schooling, migration, trade, media, verbal art, and ceremonial ritual. Drawing on research traditions on both sides of the Atlantic, the authors of these articles bring together insights from a variety of scholarly disciplines, including linguistics, anthropology, folklore, literary studies, and philology. They describe register models associated with a great many forms of interpersonal behavior, and, through their own

multi-year and multi-disciplinary collaborative efforts, bring register phenomena into focus as features of social life in the lived experience of people in societies around the world.
Katalog der Commerz-Bibliothek in Hamburg. 1864. (Namenverzeichnis der Verfasser.). Springer Science & Business Media
 This is the first fully integrated undergraduate text focussing on the ecology and management of wildlife, with an emphasis on mammals and birds. The first eleven

chapters of the book take the reader through the basic principles of ecology necessary for an understanding of wildlife management. Further chapters progress to the practical problems experienced in wildlife management, treating management as problems in applied ecology.
Contractions John Wiley & Sons

The essential M&A primer, updated with the latest research and statistics Mergers, Acquisitions, and Corporate Restructurings provides a comprehensive look at the field's growth and development, and places M&As in realistic context amidst changing

trends, legislation, and global perspectives. All-inclusive coverage merges expert discussion with extensive graphs, research, and case studies to show how M&As can be used successfully, how each form works, and how they are governed by the laws of major countries. Strategies and motives are carefully analyzed alongside legalities each step of the way, and specific techniques are dissected to provide deep insight into real-world operations. This new

seventh edition has been revised to improve clarity and approachability, and features the latest research and data to provide the most accurate assessment of the current M&A landscape. Ancillary materials include PowerPoint slides, a sample syllabus, and a test bank to facilitate training and streamline comprehension. As the global economy slows, merger and acquisition activity is expected to increase. This book provides an M&A primer for business executives

and financial managers seeking a deeper understanding of how corporate restructuring can work for their companies. Understand the many forms of M&As, and the laws that govern them Learn the offensive and defensive techniques used during hostile acquisitions Delve into the strategies and motives that inspire M&As Access the latest data, research, and case studies on private equity, ethics, corporate governance, and more From large megadeals to various

forms of downsizing, a full range of restructuring practices are currently being used to revitalize and supercharge companies around the world. Mergers, Acquisitions, and Corporate Restructurings is an essential resource for executives needing to quickly get up to date to plan their own company's next moves.

The quest for economic growth has been one of

the great global issues since the Second World War. Indeed, economic growth has also been one of the great themes of the discipline of economic history. The processes and causes of "modern economic growth," using the title of Simon Kuznets' famous book, have puzzled economic historians for at least the last half a century--and they still do, as this collection of essays shows. Over the past 50 years, historical national accounting has become a major tool of economic

historians for analyzing the process of economic growth overall. The construction and application of historical national accounts has been one of the most dynamic branches of economic history. This volume contains a series of articles by members of the international network that has, in the past quarter of a century, continued and elaborated upon the research program that emerged as a result of the groundbreaking research by Clark, Kuznets, Solow, and

Swan. In the 1980s the network became rather well organized--for example, as a result of the stimulating influence of Angus Maddison and his colleagues at Groningen University--which resulted in series of workshops and conferences, as well as sessions at several international economic history congresses (Milan, 1994; Madrid, 1998; Buenos Aires, 2002). The aim of this volume is to evaluate the current state of the field, present new findings and analytical

tools, and to reevaluate the research agenda of the network.

Designators for Aircraft Operating Agencies, Aeronautical Authorities and Services BoD - Books on Demand

Historical scholarship is currently undergoing a digital turn. All historians have experienced this change in one way or another, by writing on word processors, applying quantitative methods on digitalized source materials, or using internet resources and digital tools. Digital

Histories showcases this emerging wave of digital history research. It presents work by historians who – on their own or through collaborations with e.g. information technology specialists – have uncovered new, empirical historical knowledge through digital and computational methods. The topics of the volume range from the medieval period to the present day, including various parts of Europe. The chapters apply an exemplary array of methods, such as

digital metadata analysis, machine learning, network analysis, topic modelling, named entity recognition, collocation analysis, critical search, and text and data mining. The volume argues that digital history is entering a mature phase, digital history ‘in action’, where its focus is shifting from the building of resources towards the making of new historical knowledge. This also involves novel challenges that digital methods pose to historical research, including awareness of the pitfalls

and limitations of the digital tools and the necessity of new forms of digital source criticisms. Through its combination of empirical, conceptual and contextual studies, Digital Histories is a timely and pioneering contribution taking stock of how digital research currently advances historical scholarship. *Catalog der Commerz-Bibliothek in Hamburg* Routledge International directory of occupational organizations, associations and learned

societies in arts, science and technology.

Dictionary of Acronyms and Technical

Abbreviations Manhattan Publishing Company

This Dictionary covers information and communication technology (ICT), including hardware and software; information networks, including the Internet and the World Wide Web; automatic control; and ICT-related computer-aided fields. The Dictionary also lists abbreviated names of relevant organizations,

conferences, symposia and workshops. This reference is important for all practitioners and users in the areas mentioned above, and those who consult or write technical material. This Second Edition contains 10,000 new entries, for a total of 33,000.

TRACE - Tree Rings in Archaeology, Climatology and Ecology United Nations

This report presents international investment trends and prospects at global, regional and national levels, as well as

the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases. It provides an overview of industrial policy models for countries at different development levels and the role of investment policies within each model. It analyses the

investment policy implications of the new industrial revolution for high-, middle- and low-income countries and offers a toolkit for investment policymakers on how to use investment policies for new industrial development strategies. Marine Mammals and Northern Cultures Wiley
The tide is turning against environmentalism as the political right, industry and governments fight back. *Green Backlash* is a controversial expose of the anti-environmental movement. Tracing the

rise of the backlash from the Wise Use movement in the USA, the author reveals its rapid spread worldwide: the anti-roads movement in the UK, forestry debates in Canada and Australia, marine resource issues in Europe, South-East Asia, and controversies such as the Brent Spar. The backlash is set to get worse as the resource wars intensify. This book offers a greater understanding of the challenges and threats facing global environmentalism,

concluding that the environmental movement now has a chance to re-evaluate and change for the better to beat the backlash - a chance that must not be missed. *New Communication Technologies* Canadian Circumpolar Institute
The second edition of *Wildlife Ecology, Conservation, and Management* provides a thorough introduction to general ecological principles and examines how they can be applied to wildlife management and conservation.

Expanded and updated, this second edition includes new chapters on understanding ecosystems and the use of computer models in wildlife management Gives a comprehensive, up-to-date overview of ecology including the latest theories on population dynamics and conservation Reviews practical applications and techniques and how these can be used to formulate realistic objectives with in an ecological framework Examples of real-life management situations

from around the world provide a broad perspective on the international problems of conservation Worked examples on CD enable students to practice calculations explained in the text Artwork from the book is available to instructors online at www.blackwellpublishing.com/sinclair. An Instructor manual CD-ROM for this title is available. Please contact our Higher Education team at HigherEducation@wiley.com for more information. Note: CD-ROM/DVD and

other supplementary materials are not included as part of eBook file. Exploring Economic Growth John Wiley & Sons ARTIFICIAL INTELLIGENCE-BASED SMART POWER SYSTEMS Authoritative resource describing artificial intelligence and advanced technologies in smart power systems with simulation examples and case studies Artificial Intelligence-based Smart Power Systems presents advanced technologies used in various aspects of smart power systems, especially grid-connected

and industrial evolution. It covers many new topics such as distribution phasor measurement units, blockchain technologies for smart power systems, the application of deep learning and reinforced learning, and artificial intelligence techniques. The text also explores the potential consequences of artificial intelligence and advanced technologies in smart power systems in the forthcoming years. To enhance and reinforce learning, the editors include many learning

resources throughout the text, including MATLAB, practical examples, and case studies. Artificial Intelligence-based Smart Power Systems includes specific information on topics such as: Modeling and analysis of smart power systems, covering steady state analysis, dynamic analysis, voltage stability, and more Recent advancement in power electronics for smart power systems, covering power electronic converters for renewable energy sources, electric vehicles, and HVDC/FACTS

Distribution Phasor Measurement Units (PMU) in smart power systems, covering the need for PMU in distribution and automation of system reconfigurations Power and energy management systems Engineering colleges and universities, along with industry research centers, can use the in-depth subject coverage and the extensive supplementary learning resources found in Artificial Intelligence-based Smart Power Systems to gain a holistic understanding of the

subject and be able to harness that knowledge within a myriad of practical applications. *Verbände und Gesellschaften der Wissenschaft* Helsinki University Press
 Covering the political, social and historical background of each language, *Dictionary of Languages* offers a unique insight into human culture and communication. Every language with official status is included, as well as all those that have a written literature and 175 'minor'

languages with special historical or anthropological interest. We see how, with the rapidly increasing uniformity of our culture as media's influence spreads, more languages have become extinct or are under threat of extinction. The text is highlighted by maps and charts of scripts, while proverbs, anecdotes and quotations reveal the features that make a language unique.
Wildlife Ecology and Management Routledge
 The 2019 edition of the

World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including

the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international

investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

From the Alps dominating Central Europe to the remote Rapa Nui island in the Pacific Ocean, carry the world in your pocket with this handy book. Covering all 196 countries, Atlas features over 260 elaborately detailed maps. Each map is enriched with information about the region as well as the political profiles of the countries. From the Atacama Desert to the Zagros Mountains, this updated version presents digital landscape modeling combined with

important roads, railways, rivers, and settlements to give a complete global overview. An atlas and an A-Z gazetteer packed in one volume, this atlas will delight you with essential amazing facts, useful insights, and statistical figures from around the world. This book also includes data on climate to population and economy, helping you brush up your knowledge of other countries. Loaded with outstanding maps and a huge amount of information in a tiny package, Atlas will let you

journey across the world in the comfort of your home or classroom. Geologie en Mijnbouw De Gruyter Saur "This book focuses upon the hunting of seals and whales in the North Atlantic region and how the activities of urban-based environmentalism in regions far to the south of the hunting communities has promoted responses from diverse northern hunting peoples associated with self-determination, human rights, and sustainable development. However,

the relevance of an expanding environmentalism in the Western world goes beyond the issues of sealing and whaling, and challenges the interests and very survival of local peoples."--pub. desc.

Handbook Of Molecular Sieves Рипол Классик Approach your problems from the right end It isn't !hat they can't see the solution. It is and begin with the answers. Then one day, that they can't see the problem. perhaps you will find the final question. G. K.

Chesterton. The Scandal of Fa/her 'The Hermit Oad in Crane Feathers' in R. Brown 'The point of a Pin'. van Gujik's The Chinese Maze Murders. Growing specialization and diversification have brought a host of monographs and textbooks on increasingly specialized topics. However, the "tree" of knowledge of mathematics and related fields does not grow only by putting forth new branches. It also happens, quite often in fact, that branches which were

thought to be completely disparate are suddenly seen to be related. Further, the kind and level of sophistication of mathematics applied in various sciences has changed drastically in recent years: measure theory is used (non-trivially) in regional and theoretical economics; algebraic geometry interacts with physics; the Minkowsky lemma, coding theory and the structure of water meet one another in packing and covering theory; quantum fields, crystal defects and

mathematical programming profit from homotopy theory; Lie algebras are relevant to filtering; and prediction and electrical engineering can use Stein spaces. And in addition to this there are such new emerging subdisciplines as "experimental mathematics", "CFD", "completely integrable systems", "chaos, synergetics and large-scale order", which are almost impossible to fit into the existing classification schemes. They draw upon widely

different sections of mathematics.

World Investment Report 2018 Island Press

In its first edition, this book helped to define the emerging field of ecological economics. This new edition surveys the field today. It incorporates all of the latest research findings and grounds economic inquiry in a more robust understanding of human needs and behavior.

Humans and ecological systems, it argues, are inextricably bound together in complex and

long-misunderstood ways. According to ecological economists, conventional economics does not reflect adequately the value of essential factors like clean air and water, species diversity, and social and generational equity. By excluding biophysical and social systems from their analyses, many conventional economists have overlooked problems of the increasing scale of human impacts and the inequitable distribution of resources. This introductory-level

textbook is designed specifically to address this significant flaw in economic thought. The book describes a relatively new “transdiscipline” that incorporates insights from the biological, physical, and social sciences. It provides students with a foundation in traditional neoclassical economic thought, but places that foundation within an interdisciplinary framework that embraces the linkages among economic growth, environmental

degradation, and social inequity. In doing so, it presents a revolutionary way of viewing the world. The second edition of Ecological Economics provides a clear, readable, and easy-to-understand overview of a field of study that continues to grow in importance. It remains the only stand-alone textbook that offers a complete explanation of theory and practice in the discipline. *Guide to the Preparation, Use and Quality Assurance of Blood Components* Springer

Science & Business Media
This handbook is the only up-to-date, A to Z compilation of commercial and research zeolites. The volume presents complete patent-researched reference information on structural data, synthesis parameters, and characteristic properties. For each known zeolite there is an entry on all organics which crystallize a given structure, physical data, and applications. Data is presented in tabular or graphical form with minimal text, and a cross-referenced

literature review is provided. [Green Backlash](#) De Gruyter Saur
First Prize in Public health in the 2017 BMA Medical Book Awards Public Health and Epidemiology at a Glance is a highly visual introduction to the key concepts and major themes of population health. With comprehensive coverage of all the core topics covered at medical school, it helps students understand the determinants of health and their study, from

personal lifestyle choices and behaviour, to environmental, social and economic factors. This fully updated new edition features:

- More coverage of audit and quality improvement techniques

- Brand new sections on maternal and child health, and health of older people
- New chapters on social determinants of health and guideline development
- Expanded

self-assessment material
This accessible guide is an invaluable resource for medical and healthcare students, junior doctors, and those preparing for a career in epidemiology and public health
