Translating Kali's Feast is an interdisciplinary study of the Goddess Kali bringing together ethnography and literature within the

theoretical framework of translation studies. The idea for the book grew out of the experience and fieldwork of the authors, who lived with Indo-Caribbean devotees of the Hindu Goddess in Guyana. Using a variety of discursive forms including oral history and testimony, field notes, songs, stories, poems, literary essays, photographic illustrations, and personal and theoretical reflections, it explores the cultural, aesthetic and spiritual aspects of the Goddess in

a diasporic and cross-cultural context. With reference to critical and cultural theorists including Walter Benjamin and Julia Kristeva, the possibilities offered by Kali (and other manifestations of the Goddess) as the site of translation are discussed in the works of such writers as Wilson Harris, V.S. Naipaul and R.K. Narayan. The book articulates perspectives on the experience of living through displacement and change while probing the processes of translation

involved in literature and ethnography and postulating links between 'rite' and 'write,' 'Hindu 'leela' and creole 'play.' The author wrote the description of the Big Puja (namely chapter 9, 10, 11, and 13) and the Guyana Kali Puja Lexicon (chapter 17) in collaboration with Guyanese scholar Karna Singh. Jean Rhys has long been central to debates in feminist, modernist, Caribbean, British and postcolonial writing. Elaine Savory's study, first published in 1999,

incorporates and modifies previous critical approaches and is a critical reading of Rhys's entire oeuvre, including the stories and autobiography, and is informed by Rhys's own manuscripts. Designed both for the serious scholar on Rhys and those unfamiliar with her writing, Savory's book insists on the importance of a Caribbean-centred approach to Rhys, and shows how this context profoundly affects her literary style. Informed by contemporary arguments

on race, gender, class and nationality, Savory explores Rhys's stylistic innovations - her use of colours, her exploitation of the trope of performance, her experiments with creative non-fiction and her incorporation of the metaphysical into her texts. This study offers a comprehensive account of the life and work of this most complex and enigmatic of writers. Code of Federal Regulations Routledge Special edition of the Federal Register,

Slaves and Missionaries World Health Organization A large general bibliography is included." -BOOK JACKET. *Killer Algae* IntraWEB, LLC and Claitor's Law Publishing Given the welcomed shift throughout the academy away from essentialist and biologically fixed understandings of "race" and the body, it is a curiosity worth exploring that so many

sophisticated-and even radical-narratives retain physical and behavioral heredity as a guiding trope. The persistence of this concept in Caribbean literature informs not only discourses on race, ethnicity, and sexuality, but also conceptions of personal and regional identity in a postcolonial societies once dominated by slavery and the plantation. In this book, Rudyard Alcocer offers a theory of Caribbean narrative, accounting for the complex interactions between scientific and

literary discourses while expanding the horizons of narrative studies in general. Covering works from Jean Rhys's *Wide Sargasso Sea* through contemporary fiction from the Hispanic Caribbean, *Narrative Mutations* analyzes the processes and concepts associated with heredity in exploring what it means to be "Caribbean." *Population Research in Latin America and the Caribbean, a Reference Bibliography* Duke University Press Books DIVProvides new insight

This book, originally published in 1979, as part of the Urbanization in Developing Countries series, examines the nature and impact of unplanned urban growth in the Caribbean. Unlike other parts of the underdeveloped world, Caribbean societies are unique in having been

created by European economic and strategic needs. The original instrument for this domination was the plantation that generated the infamous history of migration from Africa and Asia and which continues to exert an important influence in determining the structure and growth of major urban centres. The book also surveys some distinctive features of Caribbean societies, including family life, religions and social divisions apparently based on race and colour,

and concludes by affirming the need to redirect development strategies from Western models towards the creation of a uniquely Caribbean identity based on the redevelopment of land and the revival of agriculture. Examples are drawn from Cuba, Haiti, Puerto Rico and the Commonwealth Caribbean.

Urbanization and Urban Growth in the Caribbean
 Peepal Tree Press

On 27 December 1831 a fire on Kensington Estate in St James, Jamaica,

signalled the start of one of the largest slave revolts in the Caribbean. Its leaders were also leaders in the mission churches and the independent sects, and their followers expected the missionaries to support them in their bid for wage work and free status. The missionaries, however, sent to save souls from sins in the face of planter hostility, were explicitly committed to neutrality on the slavery issue. This book traces the response of all classes in Jamaican society to

mission work, focusing in particular on the dynamic interplay between slaves and missionaries.

"This supposedly benign little plant - that no one thought could survive the waters of the Mediterranean - has become a pernicious force. *Caulerpa taxifolia* now covers 10,000 acres

of the coasts of France, Spain, Italy, and Croatia, and has devastated Mediterranean ecosystems. And it continues to grow, unstoppable and toxic. When Alexandre Meinesz, a professor of biology at the University of Nice, learned of a square-yard patch of it in 1988, he warned biologists and oceanographers of the potential species invasion. His calls went unheeded. At that time, one person could have weeded the small patch and ended the problem. Since then,

the plant has defeated the French Navy, thwarted scientific efforts to halt its rampage, and continues its destructive journey into the Adriatic Sea."--

"During the 1990s, the Eastern Caribbean was caught in a bitter trade dispute between the US and EU over the European banana market. When the World Trade Organization rejected preferential access for Caribbean growers in 1998 the effect on the region's rural communities was devastating. This volume examines the "banana

wars" from the vantage point of St. Lucia's Mabouya Valley, whose recent, turbulent history reveals the impact of global forces. The author investigates how the contemporary structure of the island's banana industry originated in colonial policies to create a politically "stable" peasantry. followed by politicians' efforts to mobilize rural voters. These political strategies left farmers dependent on institutional and market protection, leaving them vulnerable to any

alteration in trade policy. This history gave way to a new harsh reality, in which neoliberal policies privilege price and quantity over human rights and the environment. However, against these challenges, the author shows how the rural poor have responded in creative ways, including new social movements and Fair Trade farming, in order to negotiate a stronger position for themselves in a shifting global economy."--BOOK JACKET.

The Caribbean is one of the most tourism dependent regions of the world. This edited volume extends beyond the frontiers of normative perspectives of tourism

development to incorporate "new" ideas and perspectives that relate to the socio-cultural, political and economic realities of these societies. This edited text therefore explores tourism in the region within the context of key currents of Caribbean thought and critique in relation to issues of dependency, postcolonial interactions, race and class as well as identity and culture. Engaging a range of disciplines and themes, this volume offers a

critical examination of the
unique experiences,
challenges and practices
