Ross, *Essentials of Corporate Finance* 10e focuses on what undergraduate students with widely varying backgrounds and interests need to take away from a core course in business or corporate finance. The goal is to convey the most important concepts and principles at a level that is approachable for the widest possible audience. To

achieve this goal, subjects are distilled down to the bare essentials, while retaining a decidedly modern approach to finance. In addition, understanding the "why" is just as important, if not more so, than understanding the "how" - especially in an introductory course. Readability and pedagogy are key throughout *Essentials 10e*. The text is written in a relaxed, conversational style that invites the students to join in the learning process rather than being a passive information absorber. The new edition downplays purely theoretical issues and minimises the use of extensive and elaborate calculations to illustrate points that are either intuitively obvious or of limited practical use. There are 3 basic themes visible throughout the book: emphasis on intuition/common sense, a unified valuation approach, and a managerial focus.

Corporate Finance McGraw-Hill/Irwin
 Fundamentals of Corporate Finance (FCF) is written with one strongly held principle - that corporate finance should be developed and taught in terms of a few integrated, powerful ideas. As such, there are three basic themes that are the central focus of the book: 1. An emphasis on intuition - underlying ideas are discussed in general terms and then by way of examples that illustrate in more concrete terms how a financial manager might proceed in a given situation. 2. A unified valuation approach - net present value (NPV) is treated as the basic concept underlying corporate

finance. Every subject covered is firmly rooted in valuation, and care is taken to explain how particular decisions have valuation effects. 3. A managerial focus - the authors emphasize the role of the financial manager as decision maker, and they stress the need for managerial input and judgment.
